

ARCHITECTS OF THE WORLDS MOST ADVANCED
SEEDING AND PLANTING TECHNOLOGY

**DRIVING FIELD PROFITABILITY
ONLINE PRESENTATION**

Clean Seed has designed, developed and patented a revolutionary seeding and planting technology solution that enables precision agriculture, increasing yield and reducing operating costs while dramatically reducing the environmental footprint.

Having completed all steps necessary to create a technology revolution in our space, Clean Seed is executing our growth strategies to commercialize and distribute our game changing SMART Seeder technology into the hands of progressive crop producers both domestic and abroad.

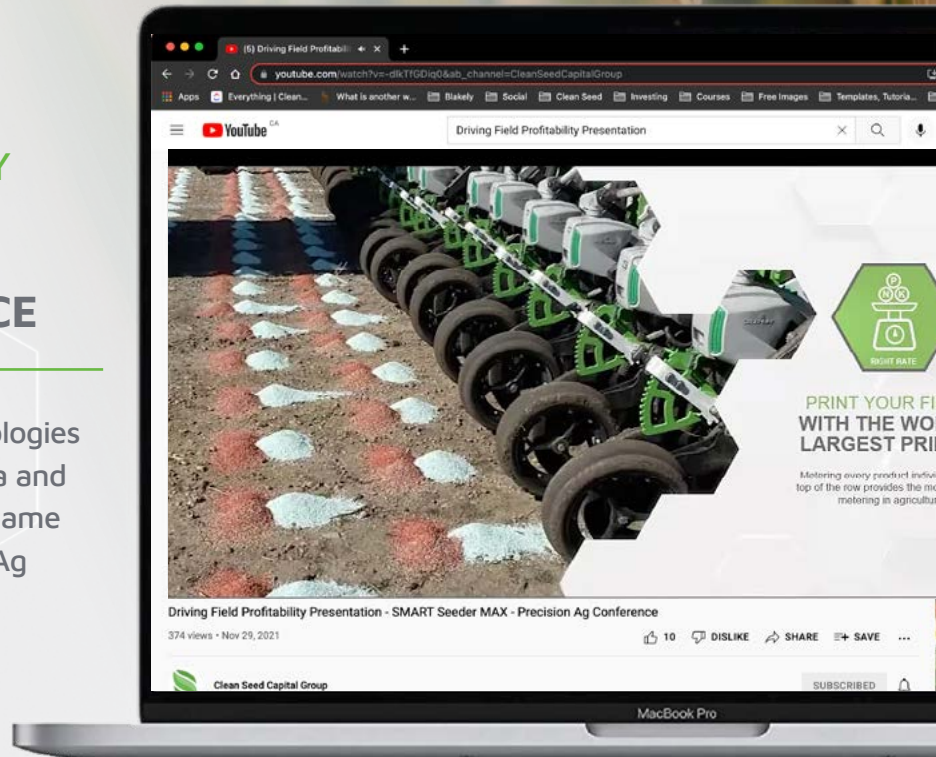

Please enjoy our agronomic presentation below referencing the use of SMART Seeder MAX and its capability to boost yields, reduce costs, lower agricultural emissions and boost carbon sequestration.
