

## Clean Seed Capital Group Receives Clear Passage to Patents on all 17 Patents for the CX6 Smart Seeder

February 13, 2014 – Vancouver, British Columbia – Clean Seed Capital Group Ltd. (“Clean Seed” or the “Company”) (TSX-V: CSX) is pleased to announce that its application under the Patent Cooperation Treaty (PCT) has resulted in Clean Seed gaining clear passage to patents for the CX6 Smart Seeder.

In March, 2013, after years of research and development, Clean Seed filed a comprehensive patent application with the World Intellectual Property Organization (WIPO) for the Company’s highly advanced CX6 Smart Seeder Technology.

An international search under the Patent Cooperation Treaty (PCT) on the patentability of the CX6 has resulted in an extremely favorable report. No patents, prior art or publications are sighted against the CX6.

Clean Seed’s patent lawyers state that when a PCT International Search Report is overwhelmingly favorable in the CX6 uniqueness and patentability, it is usual that patent offices in the 148 member countries will follow the finding of the PCT opinion and issue the applicant a patent.

Company CEO, Graeme Lempriere said, “The fundamental long-term outlook for agriculture and the related need for progressive technologies continue to present significant opportunities for Clean Seed. This exceptional result from the (WIPO) is a reflection of years of detailed development and planning and solidifies our efforts to pioneer a new segment of the market”

### About Clean Seed Capital Group

Clean Seed Capital Group Ltd is at the forefront of an agricultural shift to unparalleled high resolution seeding technologies. Clean Seed has developed an advanced precision no-till seeding system comprising several individually patented technologies, including in-ground openers, proprietary seed and fertilizer metering, and electronic control

systems. Our most recent ground breaking achievement is also our most advanced and innovative to date: The award winning CX6 Trident SMART Seeder is an industry first!

The highly advanced CX6 Trident SMART Seeder is an important advancement in agriculture. The SMART Seeder offers an unrivaled level of precision in modern no-till seeding. This drill demonstrates the future of farming.

***Forward Looking Statements:***

*This document contains certain forward looking statements. In particular, the Company makes forward looking statements that it will apply for and receive future patents on certain of its technology. There is no guarantee all such patents will be granted on a timely basis, or on terms acceptable to the Company, or at all. While the clearance granted by the WIPO is considered a valuable asset, no dollar amount is attributed to the same.*
